Heatwave Floor Warming Mats

Why Heatizon?

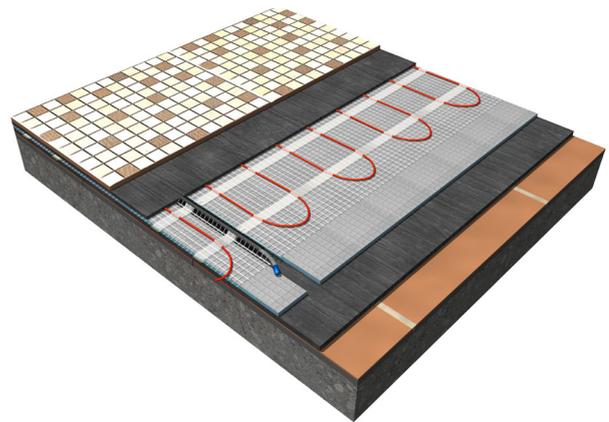

- Our experts have decades of experience in the industry.
- Support and assistance throughout your project.
- Our electric radiant products are industrial grade and have a long history of effective and reliable operation.

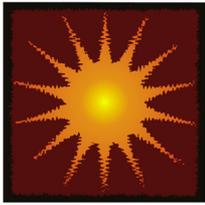

Features

- 120 to 240 Volt
- 12 watts per sqft
- 100% Efficient
- ETL listed
- Lifetime Warranty

Heatwave Mats are a convenient and economical way to add in-floor heat. The mats provide for an easy installation by simply rolling it out on the subfloor. Larger areas can be heated by multiple mats chained together. These mats come in a variety of lengths to fit any project.
