## M326CDP Ice & Snow Sensor Optional Control/Display Panel

### Features:

- M326A, M326ARS and M326ARS24 Ice & Snow Sensor Controller option.
- Control, monitor and override the Ice and Snow Sensor/Controller from remote locations.
- Monitor the status, operating mode and activation state of the sensor.
- May be set to prohibit automatic operation, to automatically operate, or to manually operate one melting cycle, then return to automatic operation.
- Requires no batteries or AC power—uses power from the snow sensor.
- May be installed as much as 800 feet away from the snow sensor.
- Indoor installation only.

### Applications:

- Snow Melting
- Roof Deicing
